BUREAU OF THE CENSUS
Richard M. Scammon, Director

APR 1962

FOR RELEASE
April 6, 1962

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic and foreign merchandise (unadjusted for seasonal variation) from \$1,826.9 million in December 1961 to \$1,642.2 million in January 1962 reflected decreases in exports to all areas as follows: Western Europe, from \$634.1 to \$564.4 million; Latin American Republics, from \$309.0 to \$253.7 million; Canada, from \$299.8 to \$286.7 million and "all other countries" from \$583.9 to \$537.3 million. Exports of Special Category commodities, which are included in these totals, fell from \$152.2 million in December to \$137.1 million in January.

With Special Category commodities excluded, exports of domestic and foreign merchandise fell from \$1,674.7 million in December to \$1,505.1 million in January. Decreases were reported in exports to O.E.C.D. countries in Europe, from \$539.7 to \$475.4 million; sterling area countries, from \$299.8 to \$245.6 million; and Latin American Republics, from \$302.0 to \$246.8 million. Decreases were noted in exports to all continents except Africa and Australia and Oceania.

Exports to Europe dropped from \$561.0 million in December to \$502.8 million in January reflecting sizable decreases in exports

¹See the January 1962 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding M.S.P. (military) shipments. Seasonally-adjusted data are not available for total exports including M.S.P. (military) shipments or by country of destination.

to the United Kingdom, from \$100.9 to \$78.8 million; West Germany, from \$94.1 to \$74.5 million; and Spain from \$29.9 to \$13.2 million. These decreases were partly offset, however, by an increase in exports to Switzerland, from \$22.0 to \$35.6 million. The decrease in exports to South America, from \$202.8 to \$160.9 million was due primarily to decreases in exports to individual countries of this continent as follows: Venezuela, from \$52.0 to \$34.6 million; Brazil, from \$40.8 to \$30.8 million; Colombia, from \$26.6 to \$17.4 million; and Chile, from \$20.2 to \$13.4 million. Exports to Asia fell from \$389.6 to \$348.9 million due largely to decreases in exports to Japan, from \$155.3 to \$134.3 million; Pakistan, from \$32.6 to \$20.7 million; and Kuwait, from \$10.1 to \$4.8 million. These decreases were partly offset, however, by an increase in exports to Saudi Arabia, from \$3.9 to \$10.7 million. Decreases in exports to Canada, from \$287.6 to \$272.7 million and Mexico, from \$69.6 to \$55.8 million accounted for most of the decrease in exports to North America from \$414.1 to \$382.7 million.

During the period, a slight increase was reported in exports to Africa, from \$77.0 to \$78.9 million. This change was due in part to an increase in exports to the United Arab Republic (Egypt), from \$18.0 to \$25.0 million which was partly offset by a drop in exports to Morocco, from \$9.1 to \$5.6 million. Exports to Australia and Oceania, valued at \$31.0 million in January, were at approximately the same level as the December total of \$30.2 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program Military aid, Mutual Security Program economic aid, and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as part of the United States export trade. Merchandise shipped in-transit through the United States between foreign countries, not entered as imports, is not included in export statistics.

COUNTRY DEFINITION: Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipments or merchanting countries and undercounted for other countries. As explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

VALUATION: The valuation definition used in the export statistics is the value at the seaport, border point, or airport of

exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report, the sampling variability can be ignored since the probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown.

In addition to the effects of sampling variation and the difficulties described above under **COUNTRY DEFINITION**, the data in this report are subject to errors from such sources as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under \$100, and the omission of parcel post shipments valued under \$50. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Reports No. FT 410 and FT 420. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.
